The girl was taken to the hospital. where she was washed, put in clean clothing and given medical treatment. The physicians regard her as weak minded. She cries most of the time but at intervals talks rationally. She insists that she has lived under the stoop for five months, creeping out at night to obtain food by stealing cans of preserved fruit, bread and meat from houses in the neighborhood.

Her name is Grace Powers, and ite. father, John Powers, a laborer, was in the hospital under treatment for burns when she was received there. Shortly before her disappearance the girl was arrested for stealing a gold watch which she gave to a male admirer. The watch was returned and she was not prosecuted

It is thought that the girl's arrest so frightened her that she sought a biding place under the stoop and continued to live there despite the cold weather. Her power of endurance, however, was well spent when the boy, chasing a cat, discovered her and she would not have survived much longer, the doctors think.

The girl's family, it appears, had not been alarmed at her disappear-Before her trouble over the watch she had worked as a servant in the family of J. P. Dressner. She obtained food from the Dressner house turing her long period of hiding
